Volume 213 1989

Contents

Letters to the Editor

The Pleiades' age and the sequential star formation
Mazzei, P., Pigatto, L. L1

Detection of CO(1→0) emission from infrared quasars and luminous Seyfert galaxies
Sanders, D.B., Scoville, N.Z., Zensus, A., Soifer, B.T., Wilson, T.L., Zylka, R., Steppe, H. L5

Large angular rotation velocity of the central parts of some spiral galaxies
Afanasiev, V.L., Sil'chenko, O.K., Zasov, A.V. L9

M 82, the Galaxy, and the dependence of cosmic ray energy production on the supernova rate
Völk, H.J., Klein, U., Wielebinski, R. L12

PG 1550+131: a short periodic precataclysmic binary with very deep eclipses
Haefner, R. L15

Millimeter observations of the Be stars ψ Persei and γ Cassiopeiae
Waters, L.B.F.M., Boland, W.,, Taylor, A.R., van de Stadt, H., Lamers, H.J.G.L.M. L19

PeV inverse Compton gamma rays from Cygnus X-3
Schlickeiser, R. L23

The Geneva photometric monitoring of SN 1987 A
Burki, G., Cramer, N., Burnet, M., Rufener, F., Pernier, B., Richard, C. L26

Proton transfer reactions of H_3^+ with molecular neutrals at 30 K
Marquette, J.B., Rebrion, C., Rowe, B.R. L29

Cosmology

Fragmenting the universe. II. Voronoi vertices as Abell clusters
van de Weygaert, R., Icke, V. 1

Extragalactic astronomy

Determination of the level of the MHD turbulence in 4 C 21.44
Roland, J., Rhee, G.F.R.N. 10

The Small Magellanic Cloud observed at 45 MHz
Alvarez, H., Aparici, J., May, J. 13

Configuration of large-scale magnetic fields in spiral galaxies
Krasheninnikova (Baryshnikova), Y., Ruzmaikin, A., Sokoloff, D., Shukurov, A. 19

Emission spectra of weakly photoionized media in active nuclei of galaxies
Collin-Souffrin, S., Dumont, A.M. 29

Evidence for gas around two radio galaxies at the Coma cluster periphery
Venturi, T., Feretti, L., Giovannini, G. 49

The high excitation extended gas in NGC 1068: a probe to the central hidden absorbing torus
Bergeron, J., Petitjean, P., Durret, F. 61

Neutrons from active galactic nuclei
Kirk, J.G., Mastichiadis, A. 75

Galactic structure and dynamics

Anisotropic and inhomogeneous tensor virial models for elliptical galaxies with figure rotation and internal streaming
Busarello, G., Filippi, S., Ruffini, R. 80

Stellar clusters and associations

The galactic giant H II region NGC 3603
Melnick, J., Tapia, M., Terlevich, R. 89

Formation, structure and evolution of stars

Large Magellanic Cloud X-2: an extragalactic bulge-type source
Bonnet-Bidaud, J.M., Motch, C., Beuermann, K., Pakull, M., Parmar, A.N., van der Klis, M. 97

The nature of absorption features in the spectra of gamma-ray bursts
Bisnovatyi-Kogan, G.S., Illarionov, A.F. 107

Tidal effects in rotating close binaries
Rocca, A. 114

The homogeneous evolution of massive stars
Beech, M., Mitalas, R. 127

(RN) Infrared bolometric corrections for AGB stars with circumstellar shells
van der Veen, W.E.C.J., Breukers, R.J.L.H. 133

Z Andromedae and the symbiotic phenomenon
Nussbaumer, H., Vogel, M. 137

The "ultracompact hot core" of G 34.3+0.15: arcsecond resolution ammonia observations
Heaton, B.D., Little, L.T., Bishop, I.S. 148

Distances and mass distribution of central stars of planetary nebulae
Weidemann, V. 155

An investigation of the micro variations of highly luminous OBA-type stars (α Cygni variables). VIII. A study of the periodicities in the radial velocity and light variations of the nitrogen-rich supergiant HD 105056 (ON 9.7 Iae)
van Genderen, A.M., Breukers, R.J.L.H., Houtekamer, P., van Roermund, F.H.P.M., Röttgering, H.J.A., Steeman, F.W.M. 161

Time-resolved spectroscopy of the eclipsing dwarf nova OY Carinae
Hessman, F.V., Koester, D., Schoembs, R., Barwig, H. 167

Numerical simulations of nonlocal convection
Da-run Xiong 176

Absolute dimensions of eclipsing binaries. XV. EM Carinae
Andersen, J., Clausen, J.V. 183

Evolutionary models for detached close binaries: the systems V 539 Arae and QX Carinae
De Greve, J.P. 195

Stellar atmospheres

Intermediate-infrared excesses of barium stars
Hakkila, J. 204

The effects of photospheric extension upon the spectra of M-type Mira variables
Bessell, M.S., Brett, J.M., Scholz, M., Wood, P.R. 209

A comparison of solar and stellar ultraviolet spectra obtained with SKYLAB and IUE
Cappelli, A., Cerruti-Sola, M., Cheng, C.C., Pallavicini, R. 226

The X-ray flare and the quiescent emission from Algol as detected by EXOSAT
van den Oord, G.H.J., Mewe, R. 245

Absolute flux calibration of the H and K lines of Ca II. chromospheric radiative losses in F and G-type stars
Pasquini, L., Pallavicini, R., Dravins, D. 261

Diffuse matter in space (including HII regions and planetary nebulae)

Snapshots of evolving model planetary nebulae
Stasińska, G. 274

On the origin of high energy cosmic rays. I. Pregalactic explosion
Parvaneh, D.L., Schatzman, E., Lagage, P.O. 287

A search for interstellar and circumstellar C_{60}
Snow, T.P., Seab, C.G. 291

(RN) A physical analysis of S II and C II layers in four molecular cloud edges: NGC 3576, NGC 6334, S 87, and S 88
Vallée, J.P. 295

Capture of field stars by molecular clouds
Bhatt, H.C. 299

The nature of the cometary nebula 1548 C 27
Vilchez, J.M., Mampaso, A., Riera, A., Phillips, J.P. 303

The L 1551 IRS 5 CO bipolar outflow: acceleration and origin
Fridlund, C.V.M., Sandqvist, Aa., Nordh, H.L., Olofsson, G. 310

Highly excited molecular hydrogen in M 42 and other nebulae
Hippelein, H.H., Münch, G. 323

The galactic foreground reddening of SN 1987 A
Gochermann, J., Goudfrooij, P., Schmidt-Kaler, Th. 333

The spatial relationship of OH and H_2O masers
Forster, J.R., Caswell, J.L. 339

Photo-thermo-dissociation. I. A general mechanism for destroying molecules
Léger, A., Boissel, P., Désert, F.X., d'Hendecourt, L. 351

The Sun

Operator perturbation method for multi-level line transfer with partial redistribution
Uitenbroek, H. 360

A numerical simulation study of solar granular convection in cells of different horizontal dimension
Steffen, M., Ludwig, H.-G., Krüß, A. 371

Relative timing of solar prompt γ-ray line and X-ray emission expected from a trap plus precipitation model for protons and electrons
Hulot, E., Vilmer, N., Trottet, G. 383

The internal rotation of the Sun
Tassoul, J.-L., Tassoul, M. 397

Dynamics of a filament at the boundary of a spot region with magnetic shear
Schmieder, B., Raadu, M.A., Démoulin, P., Dere, K.P. 402

The stability of nonlinear dynamos and the limited role of kinematic growth rates
Brandenburg, A., Krause, F., Meinel, R., Moss, D., Tuominen, I. 411

Dynamics of the solar atmosphere. I. Spatio-temporal analysis of waves in the quiet solar atmosphere
Deubner, F.-L., Fleck, B. 423

(RN) Turbulent transport of magnetic fields. IV. Damping of the mean field $<B>$ in α^2-dynamos with $\alpha \propto \cos \theta$
van Geffen, J.H.G.M., Hoyng, P. 429

Pole-equator-difference of the size of the chromospheric Ca II-K-network in quiet and active solar regions
Münzer, H., Hanslmeier, A., Schröter, E.H., Wöhl, H. 431

The solar system

A survey of the motions of asteroids in the commensurabilities with Jupiter
Yoshikawa, M. 436

The photodissociation of water in cometary atmospheres
Crovisier, J. 459

(RN) Search for water in comet P/Halley at 380 GHz
Gulkis, S., Batelaan, P.D., Frerking, M.A., Klein, M.J., Kuiper, T.B.H., Pickett, H.M., Schaefer, M.M., Wannier, P., Bockelée-Morvan, D., Crovisier, J., Encrenaz, P.J., Zimmermann, P., Destombes, J.L. 465

Polarimetry of grains in the coma of P/Halley. II. Interpretation
Dollfus, A. 469

An analysis of the observations of the mutual events of the Galilean satellites of Jupiter made in 1985 at the Observatoire de Haute Provence
Arlot, J.E., Thuillot, W., D'Ambrosio, V. 479

The colour of comet P/Halley's nucleus and dust
Thomas, N., Keller, H.U. 487

Solar wind control of Jupiter's hectometric radio emission
Barrow, C.H., Desch, M.D. 495

Instruments, data processing, and computational methods

The implications of image scrambling and focal ratio degradation in fibre optics on the design of astronomical instrumentation
Clayton, C.A. 502

Strategies for 2-dimensional telescope motion in optical interferometry
Vivekanand, M., Morris, D., Downes, D. 516

Abstracts of articles which have been published in A. & A. Suppl. Ser. 77, No. 1

Colors of extended static model photospheres of M giants
Bessell, M.S, Brett, J.M., Scholz, M., Wood, P.R. 520

Radio surveys and source counts at 408 MHz and 1420 MHz towards the Abell 1314 cluster of galaxies
Vallée, J.P., Roger, R.S. 520

Magnitudes of central stars of southern planetary nebulae
Tylenda, R., Acker, A., Gleizes, F., Stenholm, B. 520

Solar cycle variations of coronal structures
Loucif, M.L., Koutchmy, S. 521

The third astrolabe catalogue at Valinhos
Clauzet, L.B.F. 521

Astrolabe observations of Uranus at Santiago
Noël, F. 521

The group environment of Seyfert galaxies. II. Spectrophotometry of galaxies in groups
Fricke, K.J., Kollatschny, W. 521

An atlas of calculated continuum energy distributions for supernovae of type II
Hauschildt, P.H., Shaviv, G., Wehrse, R. 522

Measurements of visual double stars made at Nice with 50 cm refractor
Le Beau, J. 522

Observations of the Sun at the CERGA Astrolabe in 1986
Laclare, F., Journet, A. 522

Oscillator strengths from the solar spectrum
Thévenin, F. 522
